Solid fertilisers

- Urea
- Ammonium sulfate
- Ammonium phosphate
- Phosphorous fertilisers from incineration of domestic epuration sludge
- Calcium phosphates
- Potassium chlorides
- Potassium sulfates
- Potassium phosphates
- Nitrogen – phosphorous – potassium fertilisers (NPK - fertilisers),
(for ex. NPK 10-18-6, NPK 12-22-3 , etc.)
- Calcium – Ammoniumnitrate (for ex. CAN27 – Calcium Ammonium Nitrate)
- Oligoelements (Zn, Cu, B, Mn, Mg, Se, etc.)

Liquid fertilisers

- Biomass = Nitrogen-Phosphorous- Potassium solution (NPK 3,0-1,6-2,0)
- Nitrogen – Potassium solution (for ex. NK 5-2)
- Nitrogen – Phosphorous solution (for ex. NP 7-18)
- Phosphorous – Potassium solutions (for ex. PK 12-12)
- Urea solution
- Ammonium sulfate solution
- Oligoelements solutions (Zn, Cu, B, Mn, Mg, Se, etc.)

Origin : Chemical and pharmaceutical companies, production of food and food supplements, by-products from industrial processes

Delivery depending on availability and production flows.
Permanent analytical and qualitative product surveillance.

We stay at your service by answering you any chemical and legal question regarding fertilisers and offering you consultancy.
